

# Getting Faucet Ether

Step 1: Go to the “Get Faucet Page” page on the Application.

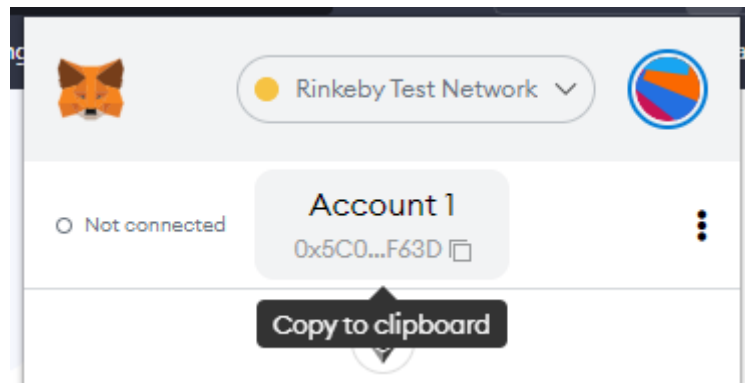

Step 2: Click on the “Click Here to Get Faucet button” on the Get Faucet Page.

# Getting Faucet Ether

Step 3: Copy your metamask wallet address from the account you wish to use.

Step 4: Paste your wallet address on the Chainlink faucet website. Select 0.1 test ETH and complete the captcha. After this, just click on the “Send request” button and wait for your transaction to complete.

A screenshot of the Chainlink faucet website form. The form has a light blue header. Below the header, there are two main sections. The first section is labeled 'Network' and has a dropdown menu showing 'Ethereum Rinkeby'. The second section is labeled 'Testnet account address' and has a text input field containing the address '0xEa52625F094aba61D60C4AcFAd468dEb93C65Fc4'. Below these, there's a section labeled 'Request type' with two radio buttons: '10 test LINK' (unchecked) and '0.1 test ETH' (checked). At the bottom, there's a green checkmark and the text 'I'm not a robot' next to a reCAPTCHA logo. Below the reCAPTCHA, there's a blue button that says 'Send request'.
